

RECEIVED MAY - 8 2010

I have lived in Allegany or the neighboring area for almost my entire life. What has always brought me back and keeps me here now is a fervent love of the peaceful, quiet country living accentuated by the natural beauty of our area. That beauty is maybe best exemplified by the glorious Allegheny mountains I am now looking at as I write this in their emerging spring time ~~foliage~~^{foliage} soon to be the full blown beauty almost incomparable in our entire nation. I love these hills so much I feel them a part of me.

I implore with all my heart you town officials who will be making a decision whether or not to build wind turbines in our back yard; do not - do not desecrate the priceless vistas we so enjoy. Do not cast a permanent blight on the unique beauty

Can be further enriched. Our environment has been poisoned and polluted enough for profit. ENOUGH!
The People have made matters abundantly clear regarding these wind turbines. The People have spoken, and the people are the law. Please respect that, as well as our environment.

Thank you very sincerely,
Robert Pierce.
